

Course in the installation of heat, cooling and water meters

At this course you will get the required knowledge to ensure an efficient and hassle-free installation of meters. You as an installation technician will learn everything to be able to carry out a proper installation.

The course participants will have a presentation on the requirements and special conditions applying to the installation of heat, cooling and water meters. The course also gives a thorough introduction to the most important meter variants and their functions as well as practical exercises.

Preconditions

Registration as a Kamstrup customer.

How to participate

Contact the sales department of Kamstrup for further information.

Who can participate?

The course is aimed at installation technicians who work with installation and exchange of meters.

The course is primarily held in Denmark, but can also be offered in other countries

It is held as classroom training either at your place or at Kamstrup in Stilling.
