

## Delivery Model

# Do-It-Yourself Submetering

**With the Do-It-Yourself Submetering delivery model, you have full ownership of both process and solution. Kamstrup provides advice from the sideline – and is only involved as needed and agreed. Our goal is to equip you to perform all tasks on your own.**

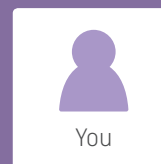

We provide guidance and information to prepare you for the tasks ahead including materials for in-house self-studies. We also prepare a radio plan proposal for your project to ensure you get off to a good start. In addition, you have access to our knowledge and services based on a pay-as-you-go approach. If guidelines are followed, you can expect your system to perform according to the normal standard of systems from Kamstrup. There is no performance guarantee included in this delivery model, but if you follow the guidelines provided by us, you can expect the performance to be 98 %.

### Preparation

### Roll-out

### Benefits

- Quick guide webinar
- Guides and materials for self-studies
- Radio plan proposal for your project
- Pay-as-you-go access to the support you need when you need it

### Recommended training

- Planning
- Installation
- System user

# Do-It-Yourself Submetering

Do-It-Yourself Submetering is offered for projects with 100, 250, 500, 800 and 1,500 metering points.

If you would like Do-It-Yourself Submetering for a project with more than 1,500 metering points, please contact Kamstrup with your request.
