READY Classroom Basic

Course description

This course is an introduction to READY and its basic functions. The course will explain what READY is and how to perform everyday operations. Focus will be on using READY for billing purposes.

What you will learn

You will get an overview of READY and learn how to perform basic operations including:

- How to get started with READY
- How to collect meter readings
- How to organise and find meter readings in READY
- How to export meter readings to your billing system

Contents

- Introduction
- Overview of READY
- My Kamstrup
- Installation
- Meter import
- Customer import
- Meter groups
- Collection of readings
- Find and view readings
- Export to billing system
- User guide and videos

Prerequisites

None

Who this course is for

New READY users

Duration

1 day

Location

Online or at your premises

Registration

Sign up by contacting your Kamstrup contact person.

READY Classroom Advanced

Course description

This course is a walk-through of the remote reading infrastructure and the more advanced functions in READY. Focus will be on how to get more value out of your data in READY by using it for troubleshooting meter installations, monitoring consumer consumption, automating processes and creating reports.

What you will learn

You will learn about remote reading devices and how to perform advanced operations in READY including:

- How to work with reading infrastructure devices
- How to use the analysis tools in READY
- How to automatically import and export data
- How to set up consumption alerts
- How to create reports

Contents

- Reading network and devices
- Automatic import and export
- Custom fields
- Heat reports/water loss analysis
- Data comparison
- Consumption report
- Performance report
- Network sharing
- Consumption alerts
- Troubleshooting

Prerequisites

- READY Classroom Basic or similar user experience
- Fixed Network subscription to READY

Who this course is for

People who already have basic READY skills and want to benefit from the more advanced functions in READY.

Duration

1 day

Location

Online or at your premises

Registration

Sign up by contacting your Kamstrup contact person.

READy Classroom Customised

Course description

This course contains the READy topics selected by you. You may for example want to combine specific topics from READy Classroom Basic with other topics from READy Classroom Advanced. If you have one or more add-ons to READy, you may also want to include those. See the contents list below for available topics that you can mix and match to meet your specific training needs.

What you will learn

You will get practical, easy-to-understand knowledge and how-to training in the topics you select.

Contents

Available topics:

- All topics from READy Classroom Basic
- All topics from READy Classroom Advanced
- Meter exchange
- API Access
- Priority meters
- Notifications
- Radio Mesh
- Infrastructure (installation scenarios)
- Wired M-Bus scheduler (more technical walk-through of wired M-Bus)

Prerequisites

None, the training is adapted to your needs.

Who this course is for

READy users who need training in READy add-on modules or want to adjust the training contents to specific needs.

Duration

½ day or 1 day (depending on contents)

Location

Online or at your premises

Registration

Sign up by contacting your Kamstrup contact person.

READy Classroom Brush-up

Course description

This course is a brush-up of your basic READy skills with focus on the annual reading. The course is specifically designed for people who mostly use READy in connection with an annual reading and need to be reminded of what to do. The course is an e-learning course. The self-learning format lets you follow the course at your own pace. You can watch the e-learning modules as you have time, stop at any time and then come back to learn more later.

What you will learn

You will learn what you need to check and what you need to do in order to be ready for the annual reading. You will also be reminded of how to collect the meter data and how to export them to your billing system.

Contents

- Update of and access to required programs
- Update of meter and customer data
- Collection of meter data
- Export of meter data to billing system

Prerequisites

None

Who this course is for

Existing READy users who need a brush-up of their basic READy skills.

Duration

1 hour

Location

E-learning course

Registration

Sign up by contacting your Kamstrup contact person.
