

Leak Detector 1.5.2 now highlights neighbouring Meters of Interest

Improved identification of Meters of Interest

Kamstrup Data scientist have made a range of improvements to the way Leak Detector identifies and prioritizes “Meters of Interest”.

With this update, neighbouring meters that detect similar trends in acoustic noise levels are grouped together, pinpointing potential leaks more accurately and making it much easier for you to inspect the list of meters that need attention. Kamstrup recommends that you investigate the meters on the list first.

To benefit from this improvement, click the “Meters of interest” tile on the dashboard. This takes you to the prioritized list of meters that pick-up noise with leak characteristics. When such meters are close to each other, they are now grouped together and sorted by their noise levels. Thus, when present, grouped meters are placed at the top of the prioritized list.

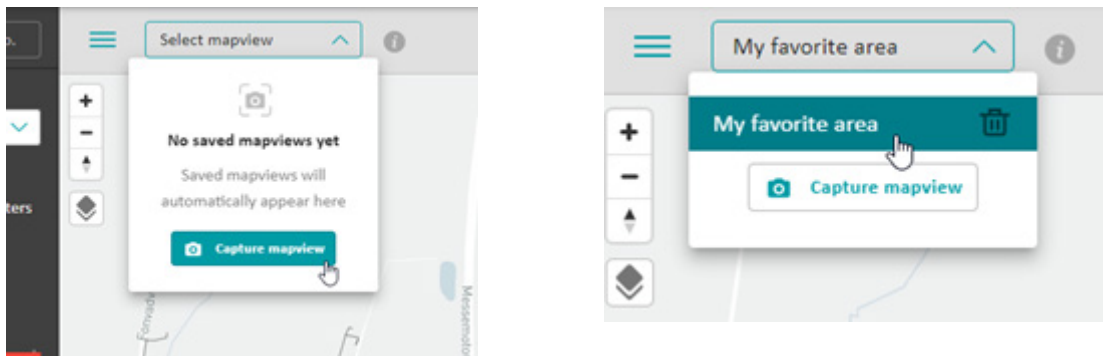

Additionally, measures to reduce false alarms have been implemented. Meters with no noise correlation with neighbouring meters are displayed as “Meters of Interest” with a slight delay. Such meters appear below the geographically grouped meters if such are present.

Finally, meters that detect noise caused by a neighbouring meter with constant consumption (leak after meter) have been removed from the list of meters of interest.

Favorite areas on the map

You can now create a mapview. A mapview is a favourite area that Leak Detector remember, so you have quick access to the areas you look frequently into. Leak Detector allow you to create up to 10 mapviews.

In the Dropdown "Select Mapview". You can capture an area on the map and save it and in the future select the area for quick access.

Copy of address information

If you need an address or serial number from a meter, it has now become much easier. Place the mouse next to the address or serial number and a small icon appears. Click on it, and the address or serial number will be copied to the clipboard. You can also copy the address from the list with selected meters.

| Meters of int... | Address | Serial number | Latest reading | Latest value |
|------------------|---------------------------------|---------------|-----------------------|--------------|
| - | Åbakkevej 11 Odense 5210 | 9999902 | 11/08/2023 1:00 AM | 817 |
| + | Åbakkevej 15 Odense 5210 | 9999904 | 11/08/2023 1:59 AM | 16 |
| - | Åbakkevej 17 Odense 5210 | 9999905 | 11/08/2023 1:59 AM | 16 |
| - | Berberisvænget 2 Odense 5210 | 11900303 | 03/01/2024 1:00 PM | 28 |
| - | Berberisvænget 5 Odense 5210 | 11361160 | 03/01/2024 1:00 PM | 14 |
| - | Berberisvænget 8 Odense 5210 | 11361160 | 03/01/2024 1:00 PM | 14 |

| Address and serial no. | Event date | Event | Info code | Track | ignore |
|---|---------------|--------------|-----------|--------------------------|--------------------------|

Kamstrup wishes you pleasure with Leak Detector release 1.5.2.

Happy leakage hunting!

**Best regards
Kamstrup A/S**
