

READy Up & Running for Submetering

With READy Up & Running, you get off to a better and faster start using READy.

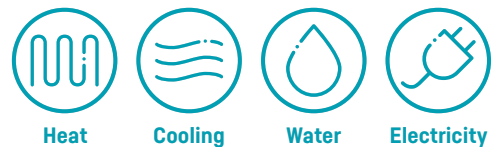

We set everything up, get you familiar with READy – and if you have questions, we have the answers. This gives you the best possible conditions for using READy as a Meter management system and help you to utilize all the features READy include.

Who is this for?

READy Up & Running is for customers who want a shorter learning curve and a helping hand in creating the right foundation for using and getting maximum value out of READy.

What is in it for you?

- **Hassle free installation**
We handle installation of your READy system including verification test and guarantee correct set-up to enable correct import/export of data.
- **A good head start**
We give you a walk-through of READy to make sure you become familiar with the tool and have the right foundation to start using READy as your meter management system. We make you comfortable to handle all processes yourself going forward.

kamstrup

What do you get?

Setup and configuration

One of our certified READY technicians will from remote, take care of the installation, setup and configuration. This includes providing access to the right users, activating your subscription, setting up import and export jobs as well as testing and verifying that everything works properly.

Introduction to READY

You get a full walk-through of your new tool to get familiar with its different features and user interface so that you are all set to start efficiently using READY as your meter management tool.

For successful output of this service, a minimum of 10 meters must be installed. Furthermore network (concentrators and antennas) must be installed for fixed network solutions. Access to customer's pc is a prerequisite to receive online support.

Should you need additional support, ask your Kamstrup contact for more information.

Looking for more?

With our add-on services you can customise your Up & Running service to give you just what you need.
