

Billing Data as a Service

If data collection and hosting are not your main areas of interest – and maybe even something you would rather not worry about – our Billing Data as a Service solution is just the thing for you.

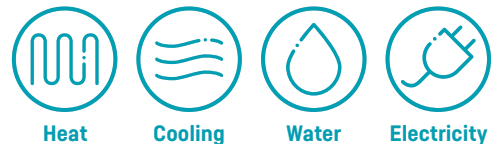

With Billing Data as a Service, we handle all aspects of collecting and securing your meter data and make it available to you when and how you want it in an easy and secure manner.

Who is this for?

Billing Data as a Service is for anyone who needs meter data, but wants to avoid the hassle of data collection and data handling. We collect the data and make it available to you in an easy and secure manner, allowing you more time to focus on other important tasks.

What is in it for you?

- **Access to the data you need**
Whatever you need your meter data for, we make sure that you get the data you need to handle billing and administration.
- **You decide when and where**
You decide whether you want your data on a daily, weekly or monthly basis and whether you want it delivered to you by email or via download from a secure FTPS/SFTP server. It's up to you.
- **We keep your data secure**
We make sure that the Kamstrup system is safe from IT security threats and that your data is made available to you in compliance with GDPR regulations. The meter data is stored securely in our systems and you avoid having to worry about data protection, backup, fallback solutions or restoring of data.

What do you get?

5 years' support and maintenance

When choosing Billing Data as a Service, you get access to software updates and help from our ServiceDesk for 5 years. The ServiceDesk offers support and assistance via email or phone to help you with any difficulties or issues with data availability. The software updates keep the meter reading system up-to-date, ensuring that your supply of meter data is always stable and reliable.

Data collection and data security

Kamstrup assumes responsibility for collecting data from your meters and keeping it safe in our systems. We take care of the software and server hardware, including

security, backup, recovery of data, access management and even GDPR compliance. We call it hassle-free IT.

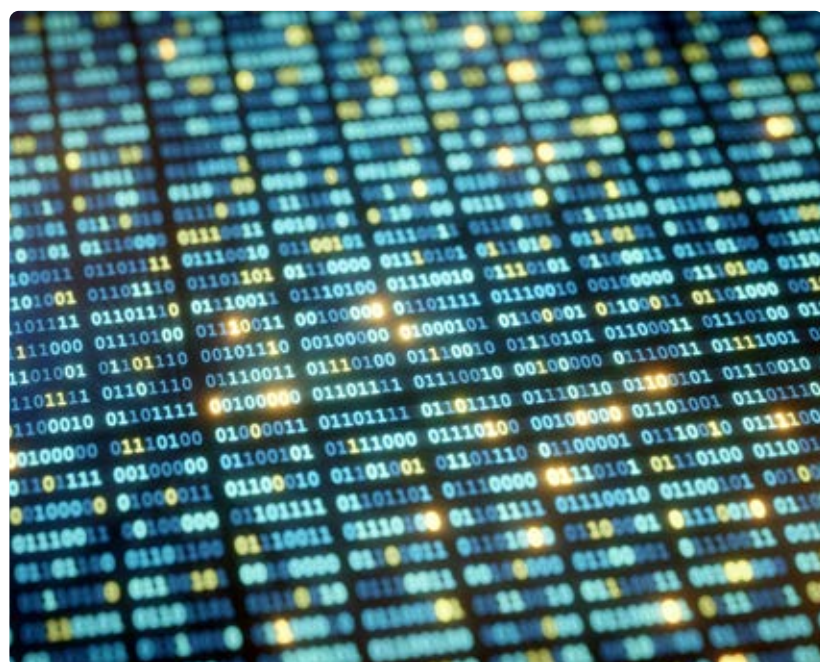

Flexible data availability

We make your meter data available to you securely by email or a secure FTPS/SFTP server, depending on your wishes and needs. From there, you can export the data for billing or analysis.

Should you need any additional support, for example for changing the standard export format (see table below) or if you would like to receive notifications regarding meter event (info codes), this can be acquired upon request. Ask your Kamstrup contact for more information.

The Billing Data as a Service standard export format contains the following values and information:

Basic data	Heat/cooling meters	Water meter	Electricity meter
Meter serial number	Energy E1 - heat energy	Volume 1	Active energy A+
Reading time	Energy E3 - cooling energy	Logged volume 1	
Meter type	Logged energy 1 heat		
Units			
Consumption type			
Customer number			
Address			
Info codes
