What do you get?

Setup and configuration

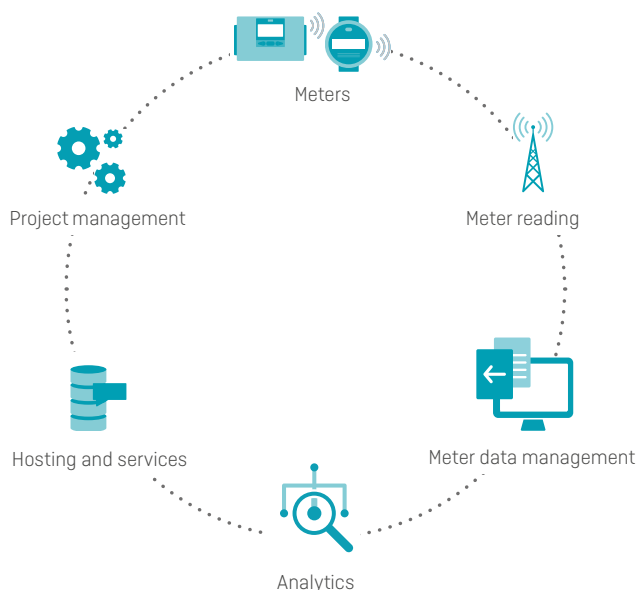

One of our product specialists takes care of the installation, system setup and configuration of the Network Monitor module via a remote connection.

This includes providing access to the right users, guide you to activate your subscription as well as testing and verifying that everything works properly.

You will get three onboarding meetings/training sessions to get familiar with its various features and the user interface so that you are all set to start efficiently locating and monitoring the meter data performance.

At the last meeting, we will guide you on how to find meters with poor data performance and give you our best advice on how to fix these on site.

Ask your Kamstrup contact for more information.
