Quick guide

- **READY Manager
Network reading**

READY is a solution that collects reading data automatically from Kamstrup water and heat meters.

Install REAdy Manager

Download and install REAdy Manager via www.kamstrup.com/my-kamstrup-login.

Before you can start using REAdy Manager you need to activate your license. This can also be done on My Kamstrup with the activation code you find on your order confirmation.

Import meters

To be able to read meters, you need to import meters into REAdy Manager.

1. Click **Import devices** and **Import**.
2. Enter login for My Kamstrup.

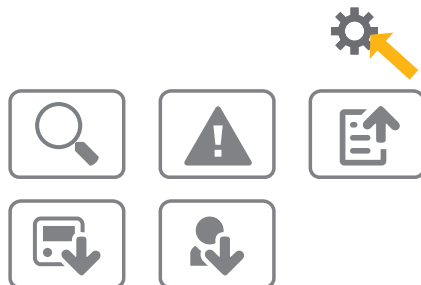

Add customer details

If you use a customer information system, you can add customer data automatically.

1. Click **Import customers**.
2. Add the file created by your customer information system.

Prepare PC

Click **Settings** and **Concentrators**. Here you can see all your registered concentrators.

If desired, you can add information about location in the note field. Select concentrator and click **Edit note**.

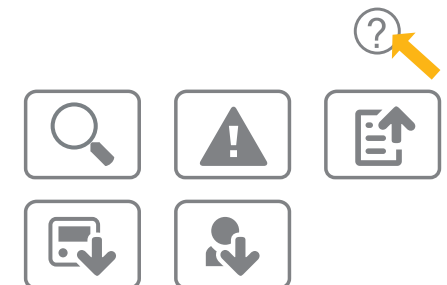

Export data

Click **Export data** to export meter data from REAdy Manager.

The exported file can e.g. be imported into your customer information system.

Need more help?

Click **F1** or click on the **question mark** in the top right corner to get more help.
