

# READy Fixed Network II: Reading in practice

## Description

Do you want to be a superuser of READy Fixed Network? Then, this advanced course is for you. Attending this course, you will get a great insight into the opportunities that the Fixed Network solution provides. We will go in-depth with info codes and troubleshooting in READy Manager and you will get to know the system completely through a series of practical exercises. The time also allows the teacher to provide individual guidance.

This course is a sequel to the course *READy Fixed Network I: Getting started*.

## Course content
