

District Analyser Trial Service

With District Analyser Trial Service, you get the ideal support throughout your District Analyser trial period – before, during and after. We set everything up, make you familiar with the tool and follow up regularly.

This gives you the best possible conditions to quickly achieve a high success rate in efficiently managing districts in your network.

Who is this for?

The District Analyser Trial Service is for you who want support during your District Analyser trial to ensure that you get off to a flying start with managing your districts and targeting your efforts. We recommend this service together with the District Analyser Trial for you to get the most out of your trial period.

What is in it for you?

- **Less hassle**
We handle setup and configuration so that the District Analyser module is ready for you to use. In other words, you can skip the hassle and jump right in.
- **A good head start**
We give you a walk-through of District Analyser to make sure that you become familiar with the tool and have the right foundation to manage your districts based on a full overview of your distribution network.
- **Follow-up to ensure success**
During the trial period, we will do monthly follow-ups with you to check up on your experience and success rate with District Analyser. And you can, of course, also reach out to us if you have any questions or issues with the tool.

What do you get?

Setup and configuration

One of our product specialists takes care of the setup and configuration of the District Analyser module via a remote connection. This includes providing access to the right users, activating your subscription as well as testing and verifying that everything works properly.

You get a full walk-through of your new tool to get familiar with its different features and user interface so that you are all set to start managing your districts in a way that is both easy and efficient.

Follow-up and support

We set up monthly follow-up meetings between you and one of our dedicated product specialists. This allows us to check in with you, ensure that things are running smoothly and help you optimise your efforts in the District Analyser module. This includes helping you look through your districts to get a better understanding of your water loss.

You can also reach us through the Kamstrup service desk via web, email and phone to get help with any issues or questions you may have related to the tool.

The District Analyser Trial Service is available throughout your 90-day trial period. Depending on your needs, both the trial period and trial service period can be extended upon request.

Ask your Kamstrup contact for more information.

Looking for more?

With our add-on services, you can customise your Trial Service to give you just what you need.

These services include:

- **Training** in District Analyser
- **Dedicated help** for a specific task or project
- ...and much more
