

Webinar: Monitoring and verification of leaks

Description

Are you working with Kamstrups Acoustic Leak Detection Solution? Then, this course will enable you to make the maximum use of your solution. We will go in-depth with the structure of the analytics program Leak Detector. In addition, you will have practical exercises that enable you to gain experience with the use of the program. We introduce relevant listening techniques for verification of information from the Leak Detector programme and we teach you where and how to listen in order to detect relevant sounds.
