

Your Water Intelligence system has been updated with new features!

Version 1.4.1.

Dear customer

At Kamstrup, we are pleased to once again present new updates to Leak Detector, all aimed at improving your gains from Leak Detector at no additional cost.

What's new?

In Leak Detector you have access to two types of reports: an "Activity report" (launched in June 2022) and a weekly or monthly "Noise report". With Leak Detector 1.4.1, we are introducing some changes to the weekly and monthly "Noise reports", in order to make them more valuable than ever and on par with the new "Activity report". The changes to the reports include:

- **From "Noise report" to "Leak report":** This is to underscore the focus of the report, namely to suggest possible leaks in a list format, which can be sent to a mail of your choice or it can be exported directly from within Leak Detector.
- **Inclusion of "Meters of Interest":** Your "Meters of Interest" have now been included in the report above the "Meters in high noise level" section. With this update, we are moving one step further away from relying solely on high levels of noise for a set amount of time to indicate leaks, and more towards relying on the "Meters of Interest" algorithm, as it takes more inputs into consideration before suggesting potential leaks, meaning that the hit rate of the suggested leaks is higher than relying on an isolated high level of noise. In other words, "Meters of Interest" is Kamstrup's best estimate on finding actual leaks.
- **Design:** The design of the report has been updated to reflect the same design as experienced within the "Activity report".

Address	Serial number	Start date	End date
		June 18, 2022	June 22, 2022
		June 13, 2022	June 15, 2022
		June 16, 2022	June 17, 2022
		May 24, 2022	June 01, 2022
		June 19, 2022	June 22, 2022
		June 11, 2022	June 14, 2022
		June 20, 2022	June 22, 2022
		June 22, 2022	June 22, 2022
		June 10, 2022	June 11, 2022
		June 02, 2022	June 09, 2022
		June 03, 2022	June 06, 2022
		June 11, 2022	June 12, 2022
		June 07, 2022	June 09, 2022
		June 19, 2022	June 22, 2022
		June 14, 2022	June 18, 2022
		June 22, 2022	June 22, 2022
		June 20, 2022	June 22, 2022
		June 17, 2022	June 19, 2022

Address	Serial number	High	Average value	Latest reading	Ignore	Track
		139	139	139		
		118	118	118		
		233	233	233		

Closed events filter: Leak Detector offers you the possibility to enter events like leak, noise etc. to a meter and close the events when the issue is handled. You can now easily locate all closed events on both the map and the list.

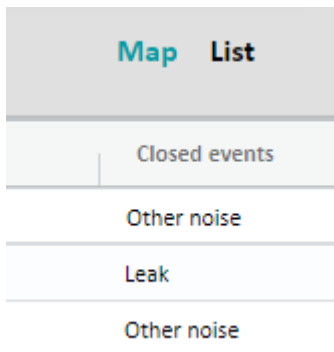

In the filter on the left, just mark "Closed events" and you will be able to see all closed events on the map.

INCLUDE

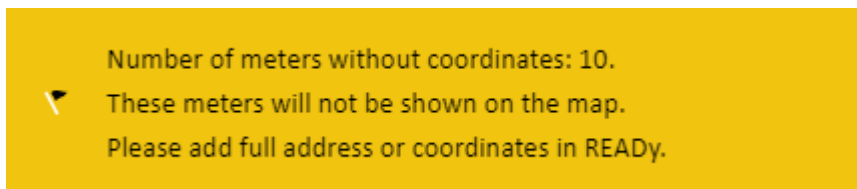

Active events 14 (14)

Closed events 77 (83)

If you need to see details on the closed events, it is possible in the list view. There is now added a new column showing all closed events.

Meters with no coordinates: Leak Detector will now tell you if you have meters with no coordinates. These meters will not be displayed in the Leak Detector map. You can add the address in READy and soon after you will be able to see the meters on the map.

What's the impact?

If you are already subscribed to receive the existing "Noise reports" you will automatically start receiving the updated "Leak reports" without you having to do anything. Additionally, no negative impact to Leak Detector's performance has been observed from this update, so Leak Detector works just as well as you are used to.

Your system will be updated!

Your system will be automatically updated the 28th of July 2022. Please contact Kamstrup Support if you experience any problems. Our support employees can help you with the update and with getting started using the new features:

- For US customers: 404-835-6716
- For global customers: +45 89 93 11 10

Otherwise, you can find all of our Leak Detector documentation on our website:

- For US customers: <https://www.kamstrup.com/en-us/water-solutions/water-analytics/leak-detector/documents>
- For global customers: <https://www.kamstrup.com/en-en/water-solutions/water-analytics/leak-detector/documents>

Your system has been updated!

Please contact Kamstrup Support at tel. +45 89 93 11 10 if your application has not yet been updated. Our support team can help you with the update and with getting started using the new features.

Kamstrup wishes you pleasure with Leak Detector release 1.4.1.

Best regards

Kamstrup A/S
