

Non-standard Export Formats READY

The Non-standard Export Formats service enables you to receive your meter data in a customized format that exactly matches the requirements of your operating systems and your daily business.

As opposed to the standard options for creating export formats in READY that meet more common customer needs, this service makes it possible to create export formats that meet individual requirements adapted to your specific circumstances and use cases.

Who is this for?

This service is for you if you need to export data in formats that you cannot create via the standard options in READY, for example if you have an old billing system or need summed up consumption data.

Heat

Cooling

Water

Electricity

What is in it for you?

- **You get more value from your meter data**
By having your meter data delivered in the exact format you need, you are able to use it in a more optimal way, e.g. for billing or analytical purposes.
- **You free up time and energy for more important tasks**
You avoid spending time and energy on manually editing your data to fit your needs. This allows you to focus on more value-adding activities.

What do you get?

A format custom-made to your needs

We make sure that you receive your meter data in the format that fits your business and your needs.

Support

With the Non-standard Export Formats service, you get direct access to specialists who are ready to assist you with any difficulties or potential issues with your export formats.

IT security

We make sure that your meter data is protected from threats and handled in compliance with GDPR, and you can rest assured that your meter data is delivered in a secure manner.

Looking for more?
