

flowIQ® SMART WATER PLATFORM

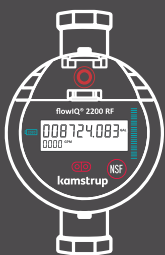

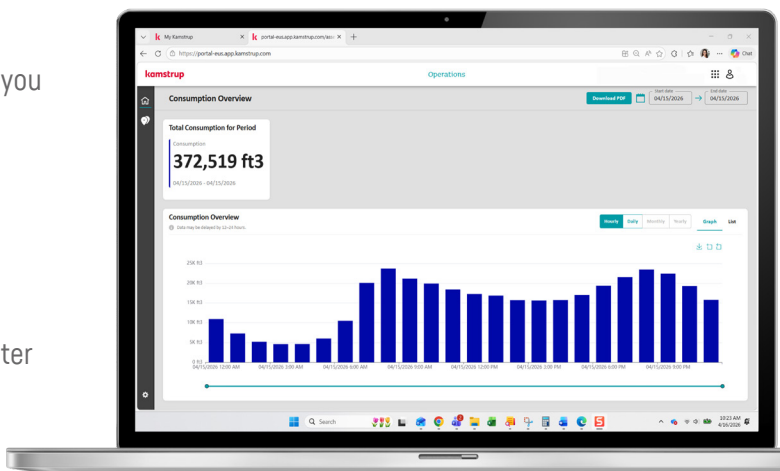

ONE VIEW. TOTAL SYSTEM INSIGHT.

Water systems are always changing. Hour after hour, demand shifts. Temperatures fluctuate. Damage happens. Infrastructure ages. Small problems develop long before they become big ones.

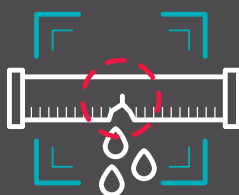

The question isn't whether change is happening. It's whether you can measure it, understand it, and know what to do next.

CONFIDENT DECISIONS START WITH TRUSTED DATA.

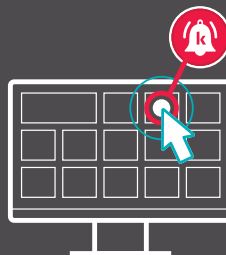

From detailed consumption and meter data to network diagnostics and distribution leak detection, flowIQ® Smart Water Platform transforms reliable measurement data into shared understanding. Every team sees what matters to their work while maintaining one connected view of the system.

The Quality of Your Meter—Now in Every Decision

Designed For Real-World Utility Operations

One Platform, For Reduced Complexity and Complete Clarity

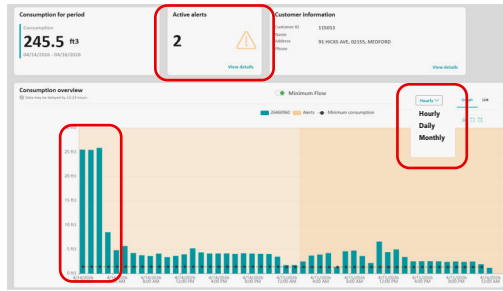

From Overview to Detail in One Step

kamstrup

ONE PLATFORM. FOCUSED VIEWS. COMPLETE SYSTEM INSIGHT.

Our flowIQ® Smart Water Platform doesn't simply collect more data—it helps every team understand what matters to them while maintaining a shared view of the distribution system.

CUSTOMER SERVICE

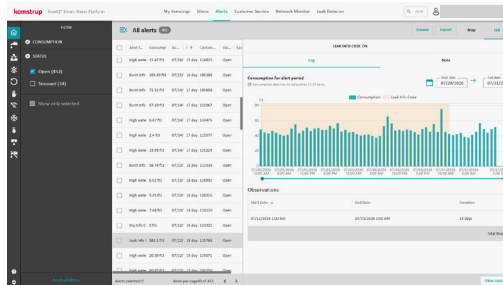

WHAT IT REVEALS

A complete view of every customer connection, including hourly consumption, account information, alerts, usage patterns, and meter activity.

MAKE BETTER DECISIONS

Resolve billing and usage questions with certainty using detailed hourly consumption history.

Identify unusual consumption patterns and proactively help customers address potential issues before they become bigger problems.

ALERTS

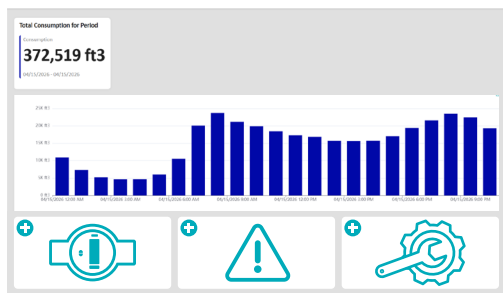

WHAT IT REVEALS

Meter-reported conditions and intelligent alerts, prioritized to show what needs attention and where.

MAKE BETTER DECISIONS

Prioritize field investigations and customer outreach based on the type, duration, and location of an issue.

Customize thresholds and alert settings to focus teams on what matters most to your utility.

OPERATIONS

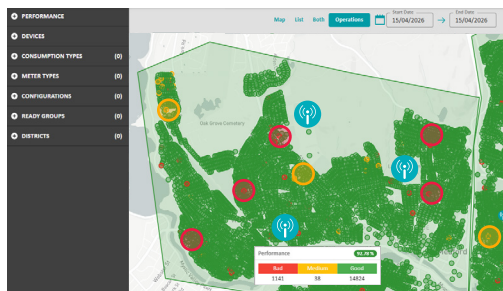

WHAT IT REVEALS

A system-wide view of consumption, operational alerts, meter activity, installations, and device status to help prioritize daily operations.

MAKE BETTER DECISIONS

Monitor meter health, alarms, and system conditions from a single operational view.

Prioritize field work, investigate exceptions, and coordinate responses across your utility.

NETWORK MONITOR

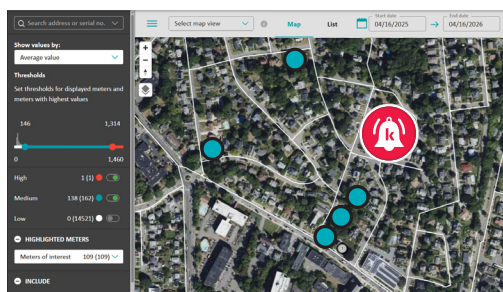

WHAT IT REVEALS

The health of your AMI network, including reading performance, communication quality, collector connectivity, and network coverage.

MAKE BETTER DECISIONS

Monitor communication performance and identify meters or collectors that need attention.

Optimize network reliability by understanding coverage, signal quality, and reading performance over time.

LEAK DETECTOR*

WHAT IT REVEALS

Potential service line and distribution leaks by combining acoustic measurements, meter intelligence, and network-wide analysis.

MAKE BETTER DECISIONS

Detect potential service line and distribution leaks before they become costly failures.

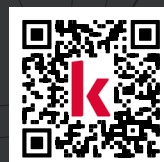

Focus field crews on the highest-priority locations using permanent acoustic monitoring and intelligent analysis.

**Leak Detector can be added to the Smart Water Platform subscription as an optional module.*

READY FOR TOTAL SYSTEM INSIGHT?

kamstrup

See your system clearly, trust your data, and act with confidence. Discover how flowIQ® Smart Water Platform can turn accuracy into action at kamstrup.com/us/swp.
